Notes on a Mercurial approach

As Transition

Think of a moment as a specific pattern, an ordering of energy into a particular form.

One Venusian, enfolding.

The next expansive, a constellation of escape.

Mercury appears at the transition through these arrangements, at the threshold, watching the in-between. Taking any given group, energy flows in meandering circuits, gathers into patterns, dissolves, scurries, flows into form again.

Pay attention to this mode of roaming, the haze outside coalescence, the crossfade between the scenes.

As clue

As leader of souls, Mercury has the ability to guide us between realms, in and out of dreams, and further into our depths.

At times we feel this elusive leading, a hidden machination—like sudden synchronicities, or objects suggesting something more than their form. Forget rationality, see what strays in. Stay close to your trail of clues.

As eclecticism

Mercury links the entirety
of existence, and anything
is up for grabs. Borrow from
your neighbor, eschew finality,
try on any style needed
to unfold an idea.
Not only inclined to thieving,
he is the patron of the found object,
or the windfall, put to clever use.
An item found just so is often
more eloquent than an item designed.
This touch allows for any fashion
or hybrid, the only faithfulness
being towards avoiding a final stance.
